

“The TRIO program has had a significant impact on my life by providing tools and support to overcome obstacles. I owe all of my success to this program!”

What is your major?

I am sophomore majoring in psychology.

What are you involved in?

I am involved in three campus jobs. I am a student ambassador, a barista at Sylvia's, and help with archives in the library.

Where do you see yourself after graduation?

After I graduate from UD, I hope to go to grad school to get an MA in Clinical Mental Health Counseling. I then hope to help the younger generations with their mental health.

What makes UD special?

The many different communities that you can be apart of make UD special. I love that I can walk around campus and see so many different people that I have met from these communities.
